Professional Experience

SaaS Labs (JustCall)

Noida, Uttar Pradesh

STAFF ENGINEER

2024 – Present

- Designed and developed reusable multi-calendar scheduling infrastructure inspired by Cal.com with timezone-aware booking and isolated multi-tenant databases, adopted across JustCall and ServiceAgent.
- Built reusable backend platform modules and npm packages adopted across 7+ microservices to standardize workflows and improve engineering velocity.
- Built a centralized authentication platform using JWT authentication and rotating CSRF tokens for secure multi-service communication, handling ~7M authentication requests daily.
- Improved distributed service reliability and horizontal scalability by tuning Kubernetes resource allocation and autoscaling thresholds based on Grafana performance metrics.
- Owned architecture and backend development of ServiceAgent, including authentication, platform modules and distributed service integrations.
- Designed distributed backend systems using TypeScript, NestJS, Redis and event-driven patterns supporting integrations across React, PHP and multi-service ecosystems.

Bajaj Finserv Health Limited

Pune, Maharashtra

BACKEND LEAD

June 2021 – 2024

- Led ABDM/ABHA/HPR/HFR healthcare integrations for DRx platform under National Health Authority initiatives.
- Designed scalable backend workflows supporting multi-clinic and multi-doctor operational models with reusable service abstractions and asynchronous processing patterns.
- Implemented scalable backend design patterns including Callback Pattern and Facade Pattern to improve modularity and reusability.

Jungle Works

Chandigarh

SOFTWARE ENGINEER

June 2019 – June 2021

- Worked on Tookan, a large-scale logistics and delivery management platform used globally for workforce and operations management.
- Designed and developed ACL systems to provide granular access control across derived but independent business entities.
- Integrated backend services with POS systems, payment gateways, accounting platforms and eCommerce services.

Technical Skills

Languages & Backend: TypeScript, JavaScript, Node.js, NestJS, REST APIs, Microservices, System Design

Frontend: React.js, Tailwind CSS, Shadcn UI, HTML, CSS

Databases & Caching: PostgreSQL, MySQL, MongoDB, Redis

Cloud & Infrastructure: AWS, Google Cloud Platform, Linux, Nginx, Pub/Sub, CI/CD

Projects

UHI Hackathon - Smart EMR

TypeScript, MongoDB, Node.js

A MODULAR SMART EMR PLATFORM BUILT DURING THE NHA UHI HACKATHON WITH REUSABLE BACKEND

<https://github.com/Manik3112/uhi-hackathon>

ARCHITECTURE AND SCALABLE HEALTHCARE WORKFLOWS.

Achievements

August
2022

Winner - NHA UHI Hackathon. Built an award-winning Smart EMR solution during the National Health Authority UHI Hackathon.

National Health
Authority

Education

DIT University

Dehradun, Uttarakhand

B.TECH IN COMPUTER SCIENCE ENGINEERING

2015 – 2019
