PROFESSIONAL EXPERIENCE

SaaS Labs (JustCall)

Staff Engineer

Noida, Uttar Pradesh

2024 - Present

- Built automated benchmarking systems to compare AI agent behavior across model and feature iterations, generating quality metrics and performance insights that guided production releases.
- Designed and developed reusable multi-calendar scheduling infrastructure inspired by Cal.com with timezone-aware booking and isolated multi-tenant databases, adopted across two independent products: JustCall and ServiceAgent.
- Built reusable backend platform modules and npm packages adopted across 5+ microservices to standardize workflows and improve engineering velocity.
- Built a centralized authentication platform using JWT authentication and rotating CSRF tokens for secure multi-service communication, handling ~7M authentication requests daily.
- Improved distributed service reliability and horizontal scalability by tuning Kubernetes resource allocation and autoscaling thresholds based on Grafana performance metrics.
- Owned architecture and backend development of ServiceAgent, including authentication, platform modules and distributed service integrations.
- Designed distributed backend systems using TypeScript, NestJS, Redis and event-driven patterns supporting integrations across React, PHP and multi-service ecosystems.

Bajaj Finserv Health Limited

Backend Lead

Pune, Maharashtra

June 2021 - 2024

- Led ABDM/ABHA/HPR/HFR healthcare integrations for DRx platform under National Health Authority initiatives.
- Designed scalable backend workflows supporting multi-clinic and multi-doctor operational models with reusable service abstractions and asynchronous processing patterns.
- Implemented scalable backend design patterns including Callback Pattern and Facade Pattern to improve modularity and reusability.

Jungle Works

Software Engineer

Chandigarh

June 2019 - June 2021

- Developed and scaled backend services for Tookan, a globally used logistics and delivery management platform supporting workforce and operational workflows.
- Architected fine-grained ACL authorization systems and led integrations with external business platforms including POS, payment, accounting, and eCommerce systems.

TECHNICAL SKILLS

Languages & Backend:	TypeScript, JavaScript, Node.js, NestJS, REST APIs, Microservices, System Design
Frontend:	React.js, Tailwind CSS, Shaden UI, HTML, CSS
Databases & Caching:	PostgreSQL, MySQL, MongoDB, Redis
Cloud & Infrastructure:	AWS, Google Cloud Platform, Linux, Nginx, Pub/Sub, CI/CD

ACHIEVEMENTS

Winner - NHA UHI Hackathon

National Health Authority

Built an award-winning Smart EMR solution during the National Health Authority UHI Hackathon. August 2022

PROJECTS

UHI Hackathon - Smart EMR TypeScript, MongoDB, Node.js

<https://github.com/Manik3112/uhi-hackathon>

A modular Smart EMR platform built during the NHA UHI Hackathon with reusable backend architecture and scalable healthcare workflows.

EDUCATION

DIT University

B.Tech Computer Science Engineering

Dehradun, Uttarakhand

2015 - 2019
